WORK EXPERIENCE

Financial Markets' expert (Trading & Training)

MubasherCafe Consultant

Dubai, United Arab Emirates **2013 - 2017**

I work as expert & Advisor to company clients from the Middle East, our focus was in the local financial markets MENA and I broadcast my analysis and commenter to TV channels in Dubai. Also direct reporting to the company CEO.

I also trade for VIP clients under POA up on their requests.

I meet the VIP clients under regular bases.

Account manager

Century Forex trading

Dubai, Alkhaleej building, UAE **2012 – 2013**

I was marketing for the company by contacting their clients to teach them how to manage their accounts and follow up their trading progress.

Financial markets' Consultant

Company name: Vip Gold Consultant,

Copenhagen, Denmark **2004-2011**

- Creating and building new Forex brokerage firm in Limassoul, Cyprus.
- In charge to hire and train the support, sales and dealers team.
- Negotiated with Meta Quote Company in Cyprus office to install and train for a year and follow up their performances and reporting direct to the owner.
- Start trading Foreign Exchange currencies (Forex) in 1993 through the National Bank in AlKhubar city in Saudi Arabia; I used to trade Gold spots, Dutch mark and other major currencies (Reuters and Apex).

- I was viewing the charts and demonstrate the technical analysis and following up the news streams. In 1994, I have started to trade as fund manager for 2 clients in the same bank and able to post markets analysis to other clients. This potential success has supported my sales and marketing skills; therefore, I have moved to work in forex firm in Dubai from 1995 – 1996 like Dubai futures company. I got better offer to join forex firm in Bangkok, Thailand in mid 1996 to work in City Link development forex firm in early 1997.
- In year 2000 after the internet era for forex, I started to trade for new clients from Dubai until 2001 in Midas A/S (Saxo bank) in Copenhagen, Denmark until 2004.
- During my study period in Denmark Technical University, I went through important course in time series analysis; this course was very important to my knowledge in how to predict the financial markets. Out of this knowledge, I have created my own prediction system based on time series analysis theory during my study in Master degree in Petroleum engineering for 2 years program, by this new knowledge in how to predict the charts' patterns in the financial markets. I used my prediction system to guide investors. I was consulting to Middle East clients and I had to start with Vip Gold Company in Copenhagen, it was in 2004. I have succeeded to target the higher annual income. One of the important successful predictions was; I have predicted the spike up or the major gap up event shown in the Natural gas historical chart which was caused by hurricane Katrina in summer 2005. I have predicted it days before, so I had bought huge number of future contracts in Natural gas at average prices of \$9 and over the weekend the hurricane had hit the oil & gas rigs in Gulf of Mexico with category 6, by Monday early morning, the market has opened gap up as predicted and hit the \$12.65 prices. I have made 1.4 Million Danish kroner just over the weekend trades only, it was in Saxo bank brokerage house.

Since then, I have developed my prediction system to be more accurate. My system simply is predicting the coming major events in the markets by comparing the financial historical charts patterns with the current patterns using the technical tools and similar case data to end up with stronger implementation for the coming prices.

I have been working as adviser to Middle East financial markets MENA (Saudi Arabian, UAE, Kuwait, Qatar and Egyptian financial market).

I was commentating my analysis to TV channels. See most of my TV interviews in YouTube channel: <https://www.youtube.com/user/vipgoldvideos/videos>

Area general manager

Al-Fozan Warehouse - building materials supplier.

Jeddah, Saudi Arabia 1994 - 1996

Area manager in AlFozan Chain Company in Jeddah branch in Saudi Arabia during December 1993 to December 1995, I was managing \$100 million worth building materials' store house to supply Jeddah city and its surrounding area in Saudi Arabia. I was managing the negotiations for importing & Shipment contracts for the building raw materials (Steel bars & Temper wood) through German agent to global sources, also closing the purchase deals to open Letter of credits LCs. Also, I was managing the local sales team and logistics sales team in Jeddah Area. I have restructured the company employees' scales upon their education and years of expertise and I have ordered special uniform for each classification. Then, I have corrected the power duties for each employee which has reduced

the waste time and energy in general. The chairman of this company was so happy and he asked me to do the same restructuring for Riyadh and Al Khubar cities' branches. (1994-1996)

Area sales manager

Modern trading office (MTO): (one of El-Ajou trading group).

Al Kubar city, Saudi Arabia **1993 - 1994**

I was managing the international import and sales for the local steel factories in the Eastern part region of Saudi Arabia. (1993-1994).

My own financial products:

1- I have built up my own trading strategy and created my own forex trading indicator and I have registered it under my name in UK-Copy rights number 316009, <https://www.copyrightservice.co.uk/>

2- I have 3 financial products in online sale at <http://mql5.com> , the tools are: The forex financial indicator which is showing the real dynamical support and resistance levels live on the charts, you can read more about it in <http://yalaforex.com>

3- Auto trader (Expert Advisor) which is including my own indicator and trading forex instruments like the currencies and it is set up free by the users, you can find it at: <http://ss-systems.com>

4- Another Auto Trader (Expert Advisor) which is including also my forex indicator but it is trading the Euro stocks index (ESTXX) instrument only. See the information at <http://sami111.com>
